## MERN Stack Developer—2 Years Experience

### PROFESSIONAL EXPERIENCE

---

- AllHeart Web** **Chandigarh, India**  
July 2025 – Present  
*MERN Stack Developer*  
**Project: MarketXY — Domain Intelligence Platform**  
Developed and maintained a domain research platform with 600M+ domain records, working across 3 web applications with a shared Node.js backend.
  - **Built** responsive UI components using React.js, Next.js 15, and Tailwind CSS for the public website, client portal, and admin panel.
  - **Developed** REST APIs in Node.js/Express with JWT authentication and role-based access control (RBAC).
  - **Worked** with MongoDB and Elasticsearch to handle domain search, DNS records, IP/ASN database, SSL certificates, and email data.
  - **Integrated** Stripe payment gateway for subscription and billing management in the client dashboard.
  - **Implemented** an async data export feature (CSV/Excel) using BullMQ job queues and ExcelJS.
  - **Used** Redis for caching and rate limiting to improve API performance.
  - **Managed** state with Redux Toolkit and TanStack React Query across all three frontend applications.
  - **Set up** cron jobs for scheduled data updates and cache cleanup.
- Pisoft Informatics Pvt. Ltd.** **Mohali district**  
October 2024 – July 2025  
*MERN Stack Developer*  
**Project: Full-Stack API Monitoring Platform (CRM Dashboard)**
  - **Designed and built** a multi-tenant SaaS API monitoring platform that continuously tracks external API health (uptime, latency, status codes) using scheduled BullMQ workers running every minute.
  - **Implemented** an automated incident management system that detects status changes, creates/resolves incidents, and dispatches email alerts via a dedicated email microservice.
  - **Built** a cron job heartbeat monitor using an inbound ping-based system to detect missed or late scheduled jobs with configurable grace periods.
  - **Developed** a React 19 frontend with server-side pagination/filtering table components, real-time dashboards (SLO, traffic, latency, saturation), and permission-based sidebar navigation.
  - **Engineered** multi-tenant architecture with per-tenant MongoDB connections and separate analytics pipelines (endpoint metrics, request logs, traces).
  - **Integrated** Redis + BullMQ for job queue persistence with automatic re-sync on Redis flush to ensure zero job loss.

### TECHNICAL SKILLS

---

- **Programming:** JavaScript, TypeScript, Python
- **Frontend:** React.js, React Native, Next.js, HTML5, CSS3, Tailwind CSS
- **Mobile:** React Native, Expo, React Navigation
- **Backend:** Node.js, Express.js, REST APIs, BullMQ
- **Databases & Search:** MongoDB, MySQL, Redis, Elasticsearch
- **DevOps & Tools:** CI/CD, Docker, Git, GitHub, Postman
- **AI-Assisted Development:** Claude, Codex, Cursor, Prompt Engineering, ChatGPT

### EDUCATION

---

- Punjab Technical University** September 2021 – June 2025  
*Bachelor of Technology – Computer Science*
